

Newsletter 02 - 2022.

Messolonghi, 30 March 2022.

Dear customers,

Many of you asked me if there will be any nuisance because of the expansion of the Marina. The answer is no.

The construction works will not start before end of September 2022.

More important is, that the first works will take place outside the Marina.

Attached I send you a drawing of the Marina.

It shows that the distance of the construction works of the first phase and the current Marina mooring area is about 250m.

Also the trucks etc. will travel outside the Marina.

So there will be no dust, noises or other nuisances inside the Marina.

The number of mooring places in the Marina are still limited.

Therefore I advise everybody that decides to stay in the Marina, to arrange an agreement as soon as possible.

Please contact me in you have any questions.

Best regards,

Jo Mennen  
CEO - President
